

```
1
2 #include <stdio.h>
3 #include <string.h>
4
5 int main()
6 {
7     char str[] = { "abbba" };
8
9
10    int l = 0;
11    int h = strlen(str) - 1;
12
13
14    while (h > l) {
15        if (str[l++] != str[h--]) {
16            printf("
%s is not a palindrome\n", str);
17            return 0;
18
19        }
20    }
21
22    printf("%s is a palindrome\n", str);
23
24    return 0;
25 }
```
